November 1, 2005

Dear Friends:

Since 2001 a new accelerator called the J-PARC has been under construction. Although the budget is always tight for this big project, it is expected that the first beam from J-PARC is expected in 2008, if the funding moves smoothly. On this occasion, therefore, we would like to call for proposals on nuclear and particles physics experiments at 50 GeV.

In the future, the call will be made periodically. The frequency and the next call will be decided after forming the PAC.

We warmly invite you to consider possible experiments at the forthcoming facility in Japan.

Sincerely yours,
