

14th International Workshop on Spallation Materials Technology

IWSMT-14

11th – 16th Nov. 2018

Place: Iwaki Business Innovation center
Fukushima, Japan

Scope:

- IWSMT is the premier international forum to present and discuss the latest research and development of materials utilized in spallation sources and accelerator driven systems (ADS) for high power operation.
- The fourteenth meeting will focus on the progress with materials, technologies-related studies, PIE, and fundamental studies including dpa, W and W alloys application for neutron/muon source cooperative with the fusion diverter study, LME (Liquid Metal Embrittlement), and radiation damage studies for accelerator based neutron sources and on issues with operating and future spallation facilities.
- For this meeting organizers would like to invite collaboration with colleagues in High Energy Physics and Radioactive Ion Beam communities in order to facilitate and promote cooperation.
- IWSMT14 shall have a related topic of "Nuclear fuel dismantling and decontamination of radioactive cesium in the environment".
