

To: J-PARC Center,

To apply for the JLAN VPN service

I state that

- I manage my JLAN VPN password appropriately.
- When I discovered unauthorized use or virus infections in my computer which was connected to JLAN VPN, I would report it to the J-PARC Center Users Office.
- My computer which is connected to JLAN VPN is set up with the following computer security.

For Microsoft Windows users:

- The computer is installed with an anti-virus software.
- Virus definition pattern file of the software is kept up-to-date automatically.
- Auto protect function of the software is activated.
- Full virus scan is carried out periodically.
- It is set up that Windows Update is automatically performed and Windows is kept up-to-date to close security holes reported from Microsoft.
- No P2P software (Winny, WinMX, KaZaA and Share) are installed.

For MAC or Linux users:

- The Operation system and software installed in the computer are kept up-to-date to close security holes reported from the software vendor or maker.
- No P2P softwares (Winny like software) are installed.
