ESAP 1.6.1

Support has been added for the following products in ESAP1.6.1:

Antivirus Products
[Antiy Labs] Antiy Ghostbusters 6.x
[Comodo Group] COMODO Internet Security 4.x
[Kingsoft Corp.] Internet Security 2010.x
[SOFTWIN] BitDefender Free Edition 2009 12.x
[Sunbelt Software] VIPRE Enterprise 4.x
[Sunbelt Software] VIPRE Enterprise Premium 4.x
[Symantec Corp.] Norton AntiVirus 18.x
[Symantec Corp.] Symantec Endpoint Protection Agent 5.x

Antispyware Products
[Symantec Corp.] Norton AntiVirus [AntiSpyware] 18.x

Firewall Products
[Check Point, Inc] ZoneAlarm Firewall 9.x
[Comodo Group] COMODO Internet Security 4.x
[Sunbelt Software] VIPRE Enterprise Premium 4.x
[Symantec Corp.] Norton Internet Security 18.x
[Symantec Corp.] Symantec Protection Agent 5.1 5.x

Issues Fixed in ESAP1.6.1:
OPSWAT:

1. Custom install of Symantec Endpoint Protection 11.x not getting detected (499991)

Shavlik:
No Shavlik fixes are included.

Issues on Upgrading to ESAP1.6.1:

OPSWAT:

1. Upgrade from ESAP1.5.2 or older fails if a firewall policy is configured where "Require Specific Products" is checked and McAfee Desktop Firewall (8.0) is selected. The upgrade doesn't fail if McAfee Desktop Firewall (8.0.x) is selected. To successfully upgrade to ESAP 1.5.3 or greater, unselect McAfee Desktop Firewall (8.0) and select McAfee Desktop Firewall (8.0.x). This doesn't result in any loss of functionality.

Shavlik:

1. The following note applies only to the patch assessment functionality. When upgrading ESAP from a 1.5.1 or older release to the current release, the services on the SA or IC device needs to be restarted for the binaries on the endpoint to be automatically upgraded. (470003, 491073)

Known Issues/Limitations in ESAP1.6.1:

OPSWAT:

1. This is a regression. When Host Checker checks for on/off status of McAfee Personal Firewall 9.x, 10.x, it opens and closes the McAfee UI. Workaround is to disable rule-monitoring if it is enabled so that the UI pops up only during HC updates.

2. AV Check fails for Norton 360 v2 with UAC enabled on Vista. (386088)

3. The Anti-Virus Check for Norton Internet Security 2009 (v16) and Norton AntiVirus 2009 on a non-XP-32bit machine with security centre disabled gives incorrect results. To workaround this issue, enable the Auto-Protect feature found at the Real-Time Protection tab in Anti-Virus or Internet Security Options.
